

Managing revenue, physician productivity and compensation across a health system and physicians group is difficult. This is further compounded by a changing reimbursement system, payor differences by location, and the continuous acquisition of independent physician groups.

Allitix's Health System and Physicians Group Planning app facilitates a better understanding of the impacts of additional physicians, how to effectively optimize and rationalize locations, as well as a flexibility in managing an ever-changing industry business model.

Our Experience

Allitix resources offer an unconstrained approach to client challenges, afforded by the firm's multidisciplinary expertise.

We seamlessly become part of our clients' specialized solution ecosystem and democratize knowledge to optimize their transformation.

We are Allitix

Quite simply, we are "all in" on client success. Our focus is delivering high-value industry solutions through connected planning & analytics. We bring data, people and plans together.

As an Anaplan Gold Partner we have achieved one of the highest customer satisfaction ratings in the world.

Health System & Physicians Group Planning

- ✓ Understand productivity, revenue and compensation of doctors by location and specialty.
- ✓ Gain more clarity around staffing requirements to better forecast revenue, contribution margins and profitability.
- ✓ Validate non-physician personnel, supplies and other expenses against work performed.
- ✓ Build a bottoms-up plan by doctor to understand RVUs and reimbursements by procedure.
- ✓ Obtain a granular view of productivity and rates for CPT codes.
- ✓ Plan inpatient/outpatient admissions by payor type.
- ✓ Forecast and manage growth in NPR/Admits.
- ✓ Manage and forecast patient days, length of stay, staffed beds and occupancy.
- ✓ Manage the impact of independent physicians groups into the overall organization and how they will be integrated.
